<p>STEVE STOLL - REPLICANTS</p> <p>After celebrating 5 years of operation with the 5 Years De:tuned box set album, De:tuned are back with a 4 track release by one of the true heroes of the New York City and global techno scene, Steve Stoll. Described by Steve as 'a soundtrack to an independent film that was never released', it features 4 heavy minimal hypnotic bangers that will please the inventive techno DJ out there. This is indeed the trademark Steve Stoll sound of the late 90s: straight-forward, rolling, tension building techno tools that sound great loud and invite the DJ to get creative. All tracks were recovered from an old DAT tape and are previously unreleased. They're exactly as good as the finest moments of Steve's own Proper NYC back catalogue: no-nonsense techno that will rock any dance floor when used right. This release is presented on 180 gr vinyl and is limited to 300 copies worldwide</p>

Distant is Rebekah's 2nd release on CLR, after the success of her first Cycles EP back in 2015, the long awaited second single Distant is veering towards a deeper side of this Artist's repertoire. Rebekah has been pushing her sound forward in the studio and has in the last year worked more and more with analogue synths and sequencers which is evident in the title track. Opting for a more broken beat and using a vast palette to create a soundscape that keeps the groove moving forward, which opens up with darker pads, maintaining the mood and feel. Distant Memory takes sounds from the original track and shapes it into something slightly different and unpredictable by Rebekah, showcasing a completely new element of this artists work. Its downtempo and slightly experimental but also warm and inviting. Synchronicity lifts up the pace and is a full out techno groove workout, Rebekah's signature kicks come in to play but is almost more elegant here, complimenting the Distant pieces but also holding its own within the more discerning of dance floors.

<p>A1</p>	<p>Now a regular member of the Figure roster, young portugese talent Lewis Fautzi resurfaces again, fresh off the back of an inspired full-length debut for Sama Records. Continuing with his own take on the darker, trippier end of the Techno spectrum, we are treated to 4 new tracks, beautifully sequenced and alive with energy. From the depths of Fautzi's studio, >Signal Of The Light< emerges with its deep resonant acid tones and broken beats. Setting the mood, Fautzi then unlocks the monster inside with three club-designed cuts that rattle, fizz, gyrate and swell with precision intensity. A name to keep an eye on without a doubt, its no surprise this young mans vision of modern Techno is finding its way into DJs sets far and wide</p>

For our 3rd vinyl release, Go Hiyama brings this powerful EP with a superb NX1 Remix. Go opens up the EP with 'Mean' which contains full of darkness and dry atmosphere, and this track has already been compiled in the 2nd Unknown Landscapes mix CD by Christian Wunsch on PoleGroup Recordings. Then, NX1 breaks and rebuilds the original 'Philosopher' completely, which sounds almost another original track. After that, 'Philosopher' original version enlightens 'techno for dancefloor' theory with straight rhythm patterns and stabs. At last, 'Modeling Of Lights' closes the journey with very fearful and dark atmosphere. The whole EP is a story and Go is a great storyteller. This is a masterpiece of Go's work

His coworker on this first release, somebody who's known to worldwide audience, based in Berlin, Alexander Kowalski is opening this release with his remix of Speedy's track False Theory. D_func, who made this remix, is the project of Alexander and represents his new way of techno production. Serious theme of this remix, with usage of heavy hi hats and hooks, is bringing up together all qualities of Alex's musical abilities. Massive peak-time track good for dynamic sets! After that, on this release, you can find original version of track named False Theory. Slow opening with kicks followed by tomes and with shake loop is quickly transforming, into technoid drive. Repetitive Synth and FX part carry this song to break where the track is going to lay down a bit which is later followed by one dynamic breaking-in of the main theme. At the end we have False Theory in Speedy's Lucky 13 Rework remix</p>

<p>A1</p>	<p>A1, "Capitulo 4". We find Gregor surprisingly accepting of his new reality: far from going crazy, he has serenely discovered in his new self everything he didn't know and didn't perceive as a human being. "Capitulo 4" is an incredibly precise description of the awakening of the new Gregor. Shadows, fog, sinuous silhouettes that are impossible to identify. In one word: confusion. B1, "Capitulo 5". Vertigo starts to ease, we can hardly feel the anguish and the heartbeat is gone. We are in a new reality and although it seems a done deal, every movement he makes tells Gregor that understanding this new world and his perception of it will not be easy. Chapter 5 demands our everything while we listen: our full dedication and attention to the last minute detail that reveals a new horizon and its new colour, or lack of it. A horizon that, nevertheless, is more perceptible for Gregor, because he can now capture all sorts of colours and emanations. B2, "Capitulo 6". Light. Gregor still ignores that most domestic insects have a strong aversion to intense light, but his human conscience is still intact and it will take him a long time to reprogramme</p>

<p>A1</p>	<p>Originally released on Richie Hawtin's Minus label a decade ago, Restore stands alone as Houle's very first long-player and helped to establish his penchant for the quirkiest side of techno and his superlative production skills. Spread across three 12"s & 11 tracks it encapsulated the dark, minimal, groove-driven sound purveyed by Hawtin and the rest of the Minus crew, while retaining a strong sense of Houle's unique character and identity. Now it's the perfect time to breath new life into an album that has stood the test of time, still utterly infectious and absorbing - a collection of music that captures an era of stripped back, yet captivating sounds. 10 years since its release, the album is getting the remix treatment and Marc has called in some of the very best in techno talent to give Restore a fresh makeover. The selection of artists who've contributed to the "Restored" project includes heavyweights such as Joris Voon, M.A.N.D.Y. and Popof together with additional reworks from stars of the new generation such as Danny Daze, Julian Jewell and Harvard Bass, all giving his tracks a new lease of life</p>

A1	The first reference of the Spanish 'new vinyl order' is available now. This is pure Techno. 'El Futurismo es una poderosa doctrina impulsada desde hace siglos por unas mentes privilegiadas: Los Jesuitas. Se basa en el principio de trasladar cualquier accion a un momento posterior, creando la permanente y vana ilusion de que esta sucedera, alimentando asi las esperanzas de los incautos. De esta manera, se puede eludir cualquier responsabilidad, ya que el presente se desdobra y queda profundamente infectado por una promesa proyectada hacia el infinito. Hay pocos artistas que dominen a la perfeccion tan noble disciplina. Si sabes de la existencia de alguno.. mimalo. Es una joya en potencia. Un maestro del engano, un arquitecto de la esquividad. Podra embaucarte entre sus manifestaciones repletas de sumo tacto, llevarle a un estado de perpetuo letargo con sus flechas de caracter sedante, pero de ninguna manera lograra cumplir sus palabras al viento, revestidas de la unica doctrina que lo drena: el Futurismo.'

A1	Ownlife refers to the tendency to enjoy being solitary or individualistic, which is considered subversive in the chaotic future, according to the science fiction novel 1984 written by George Orwell. It is also the name of a new project focused to the mental and hypnotic techno sound. Ownlife premieres with Leiras debut, 'Beginning of visions' with three original tracks and two remixes from one of the leading figures of the electronic music scene in Berlin, Sleeparchive. The ep opens with the track that gives name to the release, an energetic track exploring the space with metallic sounds in a really long development. 'Emisario' follows, built over saturated sounds and dry rhythm hits, makes this track a perfect mix tool. The B side opens with the first version of Sleeparchive, where the minimalist techno doesn't lose a bit of strength, creating a 4x4 rhythm beat based on the punch of the kick. 'Penitent' explores the more mental and repetitive territories of present techno with classic sounds in a continuous progression

A1	Muscle and Mind is the return of Oscar Mulero to long plays, after Grey fades to Green and Black Propaganda. 'Muscle' and 'mind' may seem antagonistic terms in real life, but in terms of music they make sense together, especially when talking about techno. The coalition of introspection and abstraction is not incompatible with the rough and the percussive, and this album is a good example of this. The underlying message behind the title refers to the reflection of mental states in the body, the genesis of emotions where body and mind are managed by the sense of hearing. Throughout these twelve tracks, one can dive into the musical world of this producer whose discourse mutates in every album, always intricate, always meticulous. Darkness acts as a thread and repetition as hypnotic therapy. But now, he sets his usual hard sound aside and looks for a much more cared for and precise sound, where there is room even for a harmony and musicality that go hand in hand with danceability

	<p>Northern Structures delivers a stunning new 4 track EP of broken beat industrialized techno. Known for original sound design and great mix production, Northern Structures delves into moods of isolation and experimentalism on this latest release. This is forward thinking techno that leads from a front and works not only for club listening but is perfect for home listening as well. Enjoy!</p>

	<p>Active for over 25 years, Max Durante is a legendary figure in the Italian Techno scene. An early 90's innovator in combining the sounds of Techno, Acid and Industrial with his old school project on the legendary Italian label ACV/Hot Trax. His project 'Automatic Sound Unlimited' with D'archangelo of Rephlex Records fame was ahead of the game back then. So like glove fits hand, Max fits perfectly on Sonic Groove with a cutting edge, menacing time bomb of an EP. Sharp as a razor, hard as steel this is seriously powerful stuff for those that like there techno uncompromised</p>

<p>A1 A2 B1 B2</p>	<p>TECHNO</p>		<p>GER</p>
	<p>The head of Grounded Theory Berlin returns to Sonic Groove with his strongest outing on the label to date. Henning Baer brings forth a rough and tough diverse four cut EP of chunky rhythmic techno. Recording the songs during live jams and using a previously decided pool of hardware this EP has a nice old school vibe. The sound production however is very much in the modern day with it's well crafted mix downs. This release has strong mass appeal for the purist techno connoisseur</p>

<p>A1</p> <p>A2</p> <p>B1</p> <p>B2</p>	<p>We are glad to welcome the mighty Sleeparchive to our family. The Berliner gives us two original tracks plus two remixes by label boss Oscar Mulero. 'Window 057' is an arpeggiated fool made of a crazy synth sequence, shuffled hats and subtle kick drums in a constantly moving structure. 'Window 092' starts with a massive bass drum accompanied by synthetic bleeps and noises that soon are joined by repetitive sequences carrying the flow. Oscar Mulero's remix for 'Window 057' is a cleaner approach to the original, less shuffled on the rhythms but with a lot more movement on the arpeggiated synth lines. The 'Window 092' remake slows down the pressure on behalf of a more liquid approach on the drums, and is more reverberated and deep. Oscar adds more percussive elements and puts the bleeps away using the main sequence as the centre of the arrangement</p>
