<p>A1</p>	<p>Tony Scott has been producing electronic music since the early nineties under various pseudonyms, but with Edit Select he has found his forte, and when it comes to deep, thought-provoking yet floor ready techno, there are not many artists that can do it like Edit Select. At home on some headphones with your eyes closed as it is on dance floor moving bodies '11.12.16' on Android Muziq is a must have for fans of techno on the dance floor and beyond</p>

<p>A1</p>	<p>Brotherhood Sound System Records is back with its third 12" offering and the first in a series of compilations entitled 'Percussive Parameters', delivering percussion heavy sonics focused directly at the dance floor. The lead track of the EP, Callahan's 'Kudzu', opens with a chopped, atmospheric vocal layered intelligently over rolling percussion and a hypnotic flute. A pounding 808 kick drum is teased underneath until the track switches into a relentless, chugging club tool. This one's destined to tear up dance floors for a long time... Next up are label bosses Silas & Snare with 'Eastern Shores'. An unassuming and innocuous introduction with lush pads and clean percussion that ricochets neatly off vocal cuts dramatically shifts pace and turns into a weighted, rolling cut of UK Techno. On the flip, A:Tonal leads the charge through an acid tinged stomper entitled 'Perfect Imbalance'. With driven percussion and firing synths in equal measure, this is unquestionably a peak time weapon in any DJ's arsenal. Finally, Bristol locals SYZ & LKY deliver 'Turbulence', a groove and sub laden roller that's meditative and hypnotic whilst maintaining an assertively club ready focus</p>

A1	<p>E.O.S. is the acronym of Evod, Oisel and Syntaxism. The collaboration is born together with a new catalogue of Evod Music, called Evod Excursions. Luna Nuova is the first of the 8 releases planned on transparent 7inch vinyls. The collaboration project was born to blend the main sonorities of each artist, with no borders of experimentation. All the sounds were created and processed with analog machines, live recorded. The final result is a track splitted in X and Y on the wax, a full side and an ambient side, respectively</p>
